

SIGMA

GEOSPATIAL INTELLIGENCE &
ENVIRONMENTAL AWARENESS

S.I.G.M.A

An offline-first hiking safety stack that pairs a **sensor watch**, trail-adjacent ground stations, and a first-responder dashboard to deliver live location *and* vitals, so operators know **who** needs help and **what** might be wrong, not just where an SOS was pressed.

FLEET-DEPLOYABLE

PARKS & TOURS

YOUTH PROGRAMS

EVENTS

The Problem

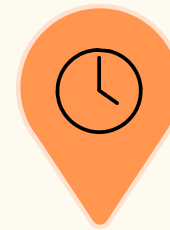

Incident

Hiker becomes
injured or
incapacitated

Delayed Response

Help arrival is
slowed or uncertain

No Data

Limited
connectivity
prevents status
updates

Outdoor participation is huge, but safety visibility is still fragmented

This fragmented landscape underscores the critical need for a unified safety solution.

63.4M

Hiking participants in 2024

181.1M

Americans participating in outdoor recreation

\$696.7B

U.S. outdoor recreation economy value added in 2024

50,000

Search and rescue missions per year in the US

4,661

People per year lost in the woods requiring assistance

About 13 per day

48%

Of lost people are hikers

168

Hiking fatalities per year in the US

Today's products solve distress signaling, not responder awareness

The Solution

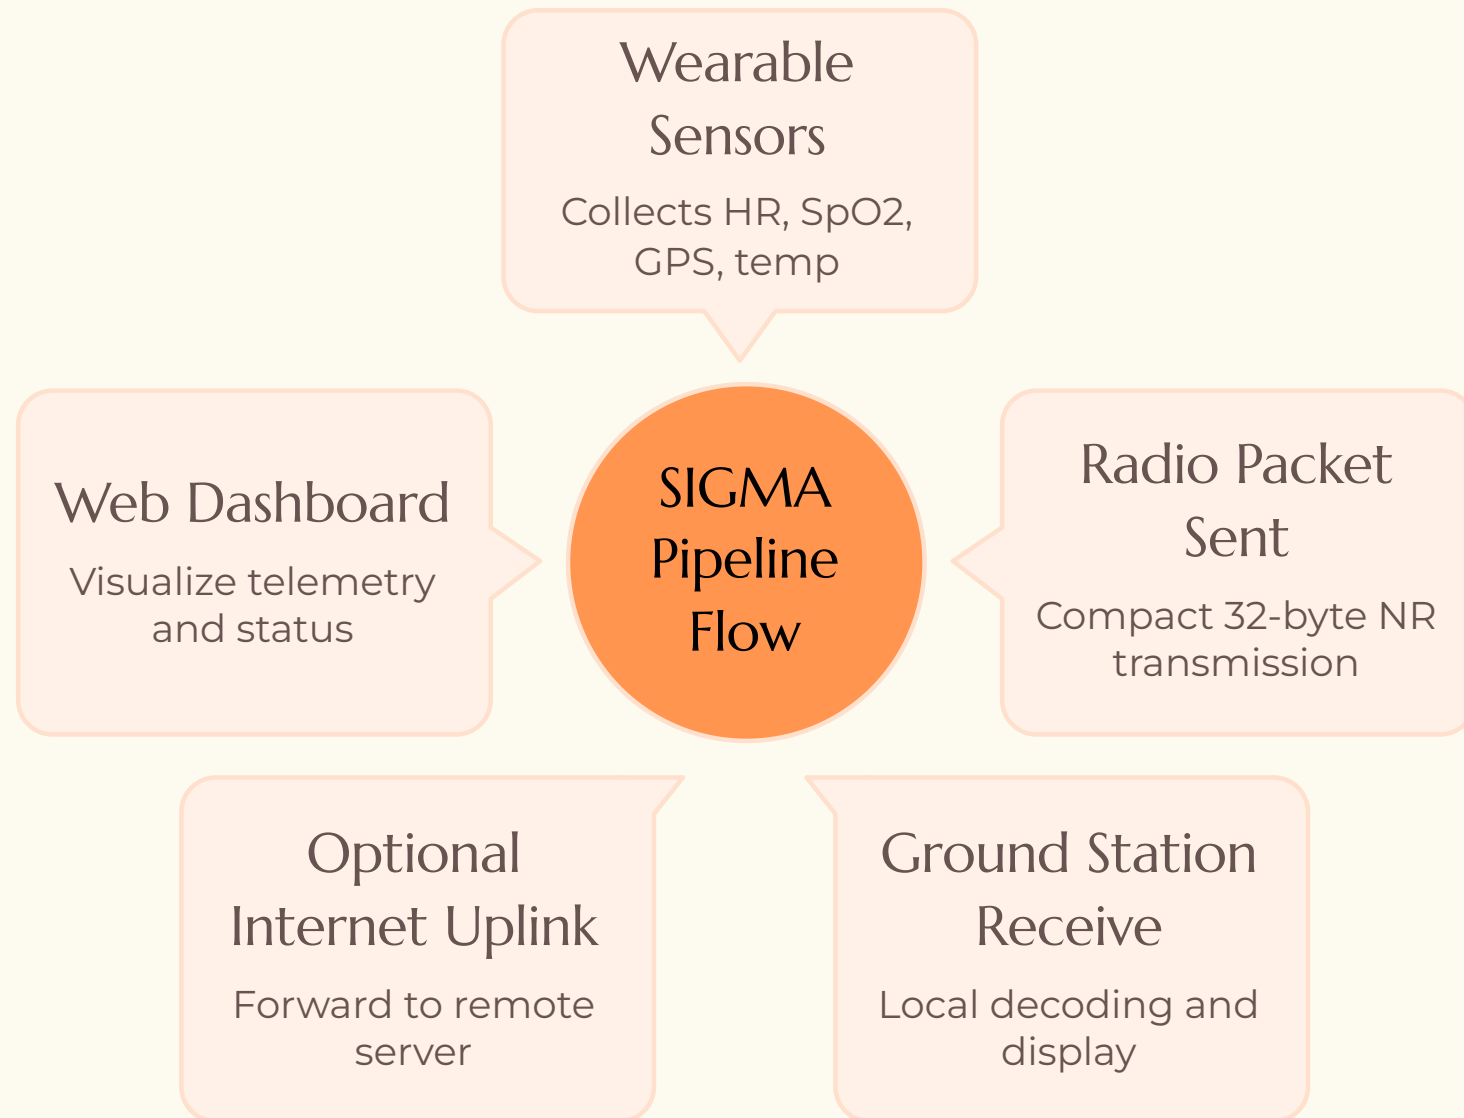

SIGMA connects the hiker, the trail, and the responder

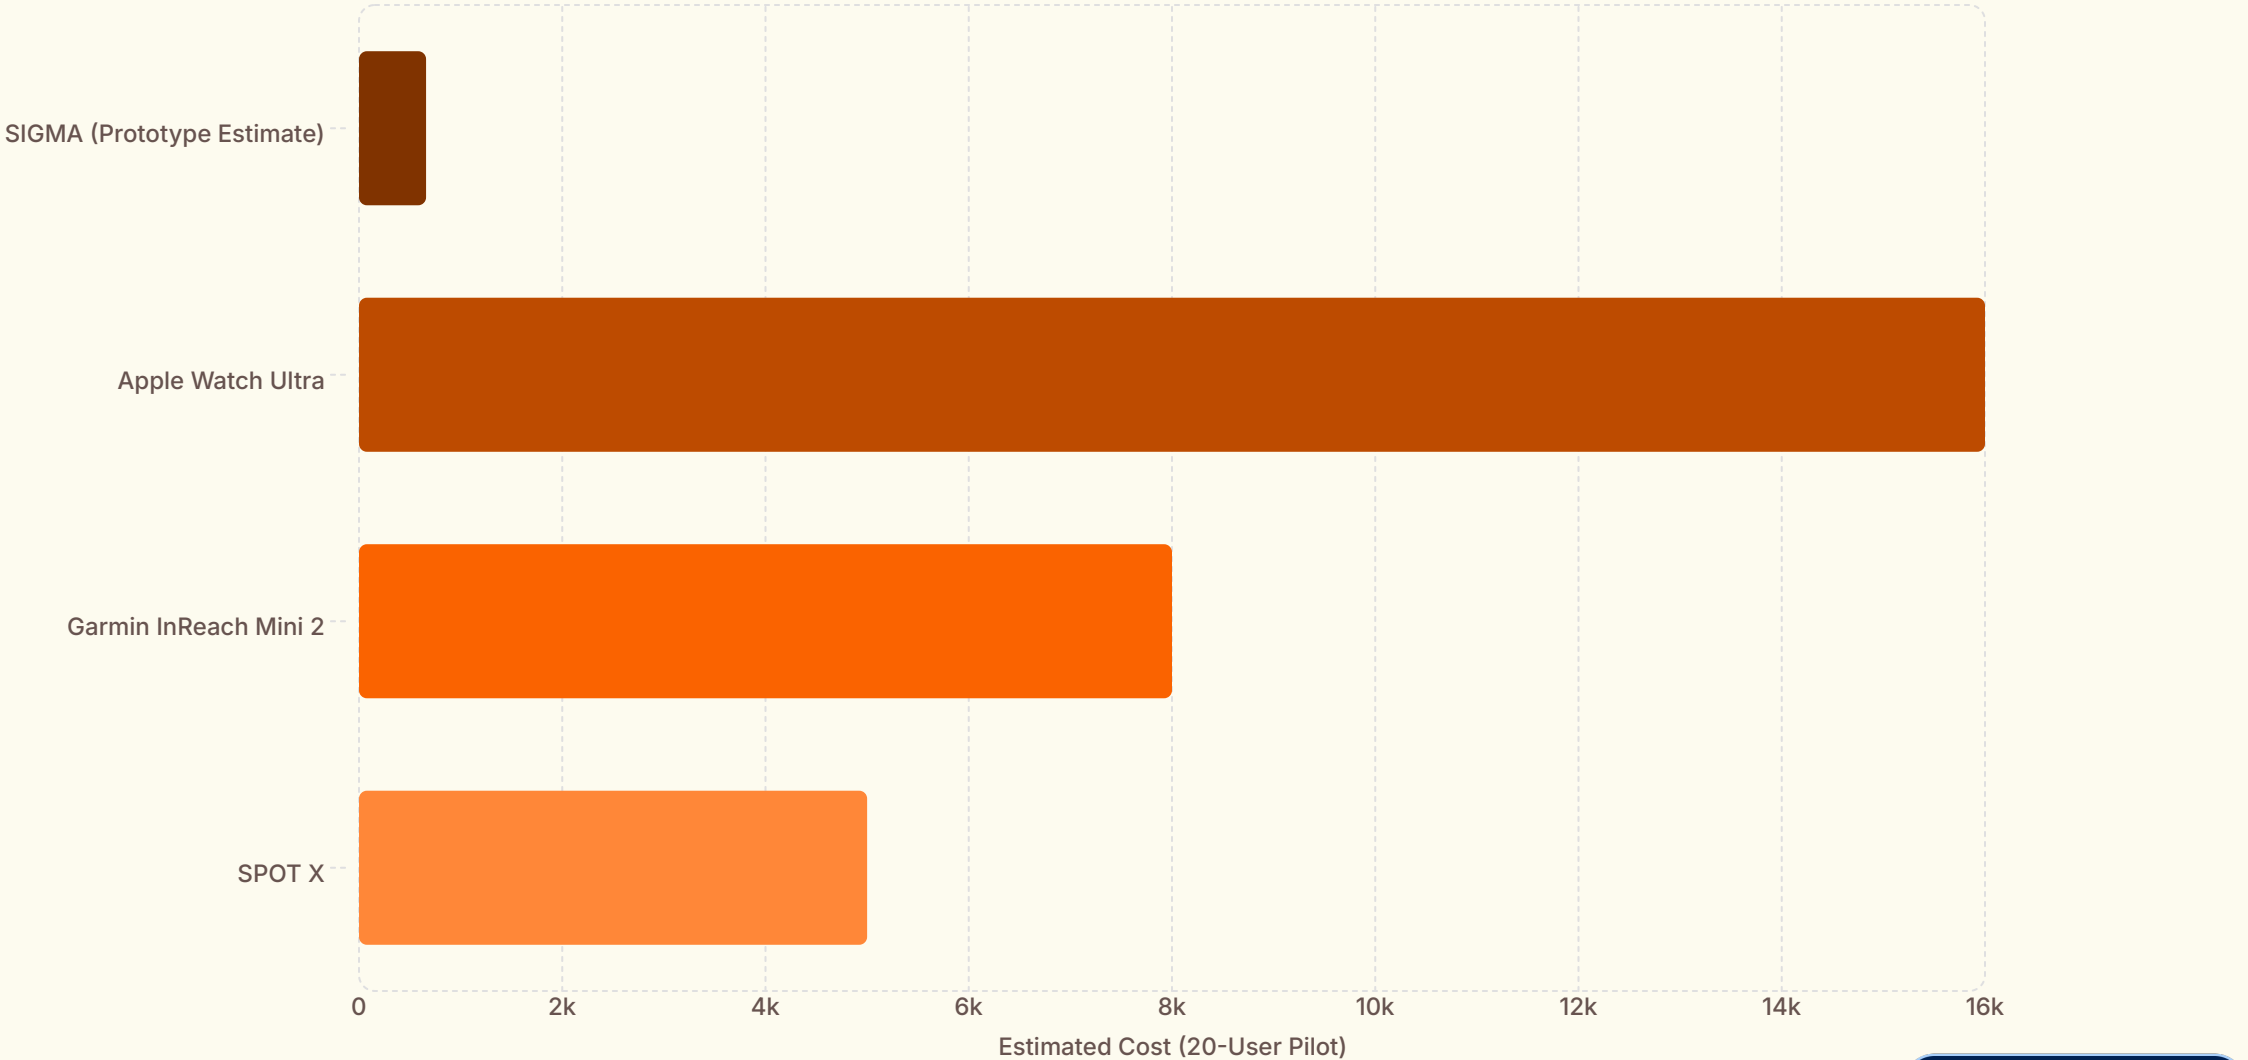

DEMO

How The System Works

Why SIGMA Wins on Cost

Solution

Ideal Customer and Business Model

The best first customers manage people, routes, and safety

Parks & Ranger Stations

Guided Hiking Operators

Camps & Youth Programs

Endurance Event Organizers

SAR Training Groups

The most likely business model is B2B / B2G: hardware kits, deployment packages, dashboard software, support and maintenance.

Go-To-Market

Start with controlled pilots, then expand by route density and operator need

1

Phase 1: Pilot

Single location, 10-20 hikers

2

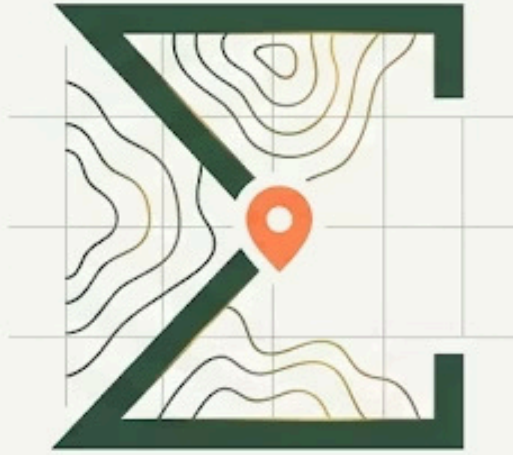

Phase 2: Managed-Route
Expansion

Multiple locations, 50-100 hikers

3

Phase 3: Broader Network
Deployment

Regional coverage
